

STARRView 9

OVERVIEW

The STARRView 9 image processing software provides the best of both worlds: high-quality imaging plus industry leading simplified user workflow. The operator friendly interface keeps much of the same workflow that users are familiar with while maximizing the area of the screen dedicated to image review. Included are a set of REVEAL Filters with easy application, designed for a variety of non-destructive testing applications.

- Fast, responsive operations (loading images, filters, etc.)
- REVEAL Filters:
 - Quality: welds and other quality apps
 - Cast: castings and complex geometries
 - Info: corrosion, erosion, and valve surveys
- Persistent annotation options
- Protractor annotation
- Built-in Readersheet
- DICONDE module, with increased functionality and interoperability with improved support for multi-image studies
- Scan parameters are embedded in film (PMT Voltages, Laser Power, Serial Number, etc.)
- User-defined filter stacks (presets)
- Contrast to noise tools
- Signal to noise tools
- Single-click cropping and saving
- Real-time filtering and stat displays
- Multiple language support
- Plug-in support
- Independent speed control for window/leveling

SPECIFICATIONS

Operating System:Windows 10, 64-Bit
 Minimum RAM: 8 GB
 Hard Drive: 500 GB RAID 1 Mirrored
 Processor: Intel Core i5 - 4430 @ 3.00 GHz CPU
